

Organic Salmon with quinoa, bok choy & turmeric

Complete food for dogs of all ages and sizes

400g

Ingredients: fresh salmon* 82%, quinoa* 10%, bok choy* 5%, minerals 1%, kelp, coconut oil*, cod liver oil, turmeric* *organic.

Additives (per kg) Nutritional additives: vitamin A 2200 IU, vitamin D3 180 IU, vitamin E 12 IU, cupric sulphate pentahydrate 1.6 mg, manganous II oxide 0.9 mg, zinc sulphate monohydrate 15 mg, sodium selenite 0.07 mg.

Analytical Constituents: protein 13.7%, crude oils & fats 5.8%, crude ash 1.2%, fibre 0.7%, moisture 77%. 131 kcal/100 g.

Ingredients	Description	Benefits for your pet
Salmon	Salmon is a highly digestible and delicious source of protein and of long-chain Omega-3 fatty acids EPA and DHA, as well as B vitamins, potassium, selenium and astaxanthin.	Salmon's protein helps to preserve bone health and prevent muscle loss. Its omega-3 fatty acids help to give your pet a shiny coat and fur as well as a healthy skin. They also support the immune system and help decrease inflammation and improve joint function and mobility.
Quinoa	Being one of the world's most popular health foods, Quinoa is incredibly nutritious. It's a seed related to spinach and absolutely gluten-free. It contains high levels of protein and vitamins B1, B2, and B6 and E, while also providing magnesium, phosphate, iron, calcium, potassium and various beneficial antioxidants to your pet.	It has hypoallergenic properties and high digestibility and is an excellent energy source. With anti-inflammatory and antioxidant properties, quinoa is also a key-player in maintaining your pet's health of the digestive tract and is ideal for dogs or cats with digestive issues or food intolerances.
Bok Choy	First cultivated in China thousands of years ago, bok choy, also known as chinese cabbage, belongs to the cruciferous family of vegetables which includes broccoli, kale and cauliflower. Low in calories, bok choy is an excellent source of selenium, vitamin C, vitamin K, vitamin A, folate, calcium, vitamin B6 and selenium.	Bok choy has a high non-dairy calcium content which is fundamental to promote stronger bones and teeth. Vitamin A helps puppies and kittens' eyes develop and vitamin C helps boost your pets' immune system. Selenium plays a crucial role in proper thyroid gland function, cognitive function and cancer prevention. The consumption of cruciferous veggies has also been linked to a decreased risk of cardiovascular disease.
Kelp	Kelp is a large, brown seaweed that grows in nutrient-rich saltwater near coastal fronts. It has the broadest spectrum of trace minerals and vitamins of any plant group in the world. Kelp is one of the richest natural sources of amino acids and also contains iodine, an essential mineral for healthy thyroid function, and iron to support circulation.	Kelp is widely known for its iodine content which helps to support your pet's glandular system and metabolism. Other benefits include helping tissue repair, speeding metabolism (and thus, weight loss), and it also prevents dental plaque and tartar build-up.
Coconut oil	Coconut oil is extracted from mature coconuts and takes the form of an edible oil that can and should be used in human and pet food. It is a source of saturated fatty acids, most of which are Medium Chain Triglycerides (MCTs).	In addition to being an excellent energy source, coconut oil has also been shown to improve skin and coat, improve digestion and reduce skin conditions and allergic reactions. Furthermore, its fatty acids are incredibly helpful in cognitive function. According to many studies, coconut oil may also be beneficial for preventing pest infections and for treating bites.
Cod liver oil	Cod liver oil is a well-regarded supplement and ingredient because it contains high levels of EPA and DHA, and also of vitamins A and D.	Cod liver oil is packed with Omega-3 fatty acids that help reduce inflammation in the body – which is a main cause of conditions like heart disease, arthritis and skin-related issues. Like other similar natural fat supplements, it promotes a shiny and healthy coat and reduces shedding considerably.
Turmeric	Turmeric is a powder spice that comes from an Asian plant in the ginger family. It's often considered a superfood, and one that can be safely used for your dog and cat food.	Turmeric's active compound is curcumin. Curcumin has antioxidant, anti-inflammatory, antiviral, antibacterial, antifungal and wound healing properties. It is used to help fight diseases like arthritis, diabetes, cancer, liver disease, gastrointestinal issues and more. It also promotes heart and liver health, pain relief and it's a natural detox agent.
